

MICROELECTRONIC INDUSTRY

Metagon's construction division has been awarded with a huge high purity project for the installation of the most advanced chemical and gas supply & distribution systems for a very big microelectronics customer in Israel. Our experts have provided specialty gases, bulk gases (laterals and submains), chemicals, heavy metals, solvents and high flow systems.

Over a period of 24 months and with over 450,000 injury-free working hours, we have executed a perfect installation for the client:

Including:

- 100 KM of electro-polished pipes
- 25 KM of Coax pipes
- 25 km of double containment 1 ¼" PFA in 3" clear PVC
- And others

Our scope included:

- Detail engineering
- Supply
- Installation: Equipment, Utilities, Process, LSS, I&C
