

STORAGE & DISTRIBUTION SYSTEMS OF WFI / PW

(WATER FOR INJECTION / PURIFIED WATER)

Description: Storage & distribution of WFI is a critical and sensitive process, ensuring that the water meets the highest quality standards of conductivity (less than $1.3\mu\text{S}$), TOC (less than 500 ppm) and microorganisms (less than 0.25 CFU/ml) and is supplied to various users for different applications in the Clean Pharmaceutical Industry; Flow capacity 10-30 m³/hr.

Industries: Pharmaceutical Industry.

Satisfied Clients:

Big Pharmaceutical Client.

Why meptagon?

- "Know how" in this highly sensitive critical system
- Turn Key Supply (Design & Build)
- Overall warranty
- Quality guarantee
- Sterile fully drainable systems, optimal fluid velocity, turbulence, minimum dea leg volumes, fully controlled and automated
