MEET MEPTAGON GROUP

Meptagon Group provides a one stop shop for industry's needs and integrated project services. We execute multi-disciplinary turnkey projects worldwide, through our five divisions:

- Management
- Design & Engineering
- Contracting
- Agencies
- Subsidiaries

Meptagon employs more than 450 people with various skills. Each division in the group has unique requirements and employees are carefully selected in order to complete their tasks meticulously. However, the ability to share knowledge among employees and further enrich the capabilities of their peers is a core strength of the Meptagon Group, which is unmatched in the industrial world today. Meptagon's employees are our, and our customer's, most important resource. Every day our employees serve our customers in a loyal, professional and fair manner, in order to fulfill the company's vision.

WHY US? IT'S SIMPLE.

With its strong client-focused orientation, Meptagon delivers creative and customized solutions for varying technological and commercial requirements. The capability to deliver all of these services with single-point responsibility in a timely, professional and cost-effective manner, together with first-class quality and safety requirements, have resulted in many successful projects that often surpass client expectations. It's no wonder that around 90 percent of the Meptagon Group's projects are initiated by returning clients.

MARKETS

- Micro-Electronics
- Bio-Technology
- Pharmaceutical
- Food & Beverage
- Other strategic Industries: Renewable Energy, Oil, Gas & Energy, Chemical, Water treatment & Desalination

AGENCIES

In order to increase the range of services offered by the group, Meptagon is constantly on the lookout for suitable companies capable of providing a wide range of industrial equipment. Endor joined the group in 2009 to provide cleanroom equipment & contamination control solutions. IN.P.C joined the Meptagon group late in 2016 to provide industrial equipment. Both companies have strong partnerships with international suppliers, allowing us to tailor standard plant and equipment to suit client requirements and specifications.

OUR TEAM

Our technical service teams are highly trained to provide technical assistance, remote monitoring and troubleshooting 24 hours a day, seven days a week. As we continue to advance our cutting-edge products, we will provide our customers with the support and service they require through highly engaged, proficient and dedicated employees. Support teams are highly skilled and trained personnel that fully understand our products and services.

Representatives for 55 years of leading worldwide companies. We supply process equipment, process safety control and instrumentation including computerized control systems and software services, heat and power generation equipment, material handling systems, analytical instrumentation and environment monitors and equipment and instrumentation for energy saving. We are active in the chemical, petrochemical, pharmaceutical, food, power & water purification industries. All equipment supplied is accompanied by technical support services for installation and maintenance.

SPXFLOW

ENDOR
PART OF MEPTAGON GROUP

Endor has over 25 years of experience as a leading specialist provider of cleanrooms and containment facilities for diversified clients in the science and technology sectors.

We also offer cleanroom commissioning and validation, as well as maintenance and service packages. Our certification programs verify that your facilities are performing according to the appropriate standards & client specifications. Included with all testing is complete documentation of the test results and certification of the rooms and devices tested. An optional, customized formal report detailing test procedures, test results and comprehensive conclusions of the testing performed can be included to suit your needs. All cleanroom testing is performed in accordance to and compliant with the International Organization for Standardization [ISO].

Hoods:

Over 25 years experience supplying and installing various types of fume hoods.

Cleanrooms:

Providing a one-stop-shop service that include initial advice, cleanroom design, construction and installation, as well as modification or refurbishment of existing facilities.

Filters:

We are the exclusive distributor in Israel of Camfil filters, a world leader in the production and development of air filters for various uses.

Raised Floor:

Supplies floating floor tiles to the Israeli market.

Laboratory Equipment:

Sells a variety of laboratory equipment produced by the world's best manufacturers.
