**To whom it may concern,**

**Letter of recommendation to an excellent supplier of HPC**

Meptagon group presentation on its website opens, with a statement that Meptagon group provides creative services tailored to changing technological and business needs, with an emphasis on customer focus.

The website also indicates that the company has completed a large number of successful projects that often exceeded customer expectations.

According to the excellent results of a project carried out by the Meptagon group in the port of Haifa, in the past year, we absolutely agree & confirm the company's statements on its website.

Meptagon group has successfully installed an automatic advanced face recognition system, for road truck drivers at the main Technological Cargo gate of Haifa Port Company.

Identification of The truck driver's face occurs while the driver sits in the truck cabin, facing an external camera.

At the Cargo Gate, two cameras installed in each lane, able to detect the face of drivers sitting in various heights of trucks , during day and night and in all weather conditions.

The Face recognitions system is a learning system, constantly improving the quality of the stored vectors (representing the drivers pictures), abiding by all privacy regulations & laws, and also allows for "on-the fly" acquisition of new drivers pictures, after they have been granted port entry access.

Meptagon group have also provided all the necessary software and hardware including all necessary software interfaces for Haifa Port relevant IT systems.

The Meptagon group project at Haifa Port Gate is to our best knowledge, a global innovation and first global pilot in a truck driver face recognition in cargo gates, thus enhancing the security Port Entry Control, and reducing costs.

Meptagon group demonstrated professionalism, a high level of service, and creativity in finding solutions for adapting the system to Haifa Port infrastructure constrains and IT systems.

Operations Division

From the date of introduction of the system at Haifa Port Gate, There has been measured a great improvement in the level of reliable identification of drivers' identities, which led to a reduction in the number of security guards at the gate.

Given the above, Haifa port highly recommends Meptagon as a technology and service provider, for carrying out intricate multidisciplinary projects, as the above Face Recognition Project at the Port of Haifa.

**David Cohen**  
COO  
Operations Division - Haifa Port Company Ltd
